

ABSTRACT OF THE DISCLOSURE

A lock (10, 40, 42, 58) for security devices 26, such as banknote dispensers, to limit access to a confined space (32, 34) within the device. A remote computer (28) exclusively controls opening of the lock (10, 40, 42, 58). A plurality of the devices may form a network controlled by the remote computer (28).
